Gain the Advantage *of Financial Expertise for Divorce Proceedings*

Financial matters of divorce proceedings can be extremely complicated, often bringing unnecessary delays in proceedings and anxieties for your clients. The expertise and experience of a Certified Divorce Financial Analyst (CDFA™) can alleviate those problems, helping you present a more effective case for your divorce clients and giving your clients more confidence in their financial futures.

Collaborating for Win-Win Scenarios

Voyager's CDFA approach depends on your unique needs. We deliver the following:

- Work solely with you to preserve divorce client confidentiality, or work directly with your clients while maintaining any level of collaboration with you
- Provide research and consult with you on application of that information
- Prepare reports for settlement discussions and for court use
- Bill hourly or per project, depending on the nature of the assignment

Certified Divorce Financial Analysts are trained in financial matters specific to divorce. We provide financial clarity, greater knowledge, smoother transitions, and post-divorce planning, while working in litigated, mediated, or collaborative environment.

Financial Clarity

Our analysis can focus on the current and the future financial needs for one or both sides. With that clarity, the divorce process can be less costly and stressful for all parties.

A Smoother Process

When transitioning out of a marriage, your clients will appreciate their reduced stress. They will have a lifestyle plan to guide their future.

Establish a Post-Divorce Plan

Voyager Capital Management, LLC addresses many financial issues, such as budgeting, investing, risk management, and estate concerns. With effective financial counseling, your clients can see their divorce not just as an ending, but as a beginning.

Greater Knowledge, Greater Power

Decision-making is difficult without complete information. Our goal is to provide the facts in an easy-to-read report. We provide guidance on the alternatives and possible outcomes.
